

Analytics Canvas Tutorial:

How to generate Tableau TDE

Analytics Canvas Tutorial:

How to generate Tableau TDE

Overview

Welcome to Analytics Canvas's tutorial. This is one of a number of detailed tutorials in which we explain how each feature within Analytics Canvas works, with additional context to help you understand it better, and to use it to best suit your own needs.

Tableau Export

You can generate Tableau TDE and TWBX files directly in *Analytics Canvas*.

Figure 1 TDE Export Block

To export data to a Tableau TDE file:

Step 1. Connect a Tableau TDE Export Block by dragging and dropping it from the Block Library, or by right-clicking on the Canvas and selecting "Add Export Block" and then "Tableau TDE Export".

Step 2. Connect the Tableau TDE Export Block to the block with the data output.

Step 3. Click on the Tableau TDE Export Block to access its settings. Click the "New TDE" button, provide the name and location of the future TDE file, and click "Save".

Step 4. Press the "Run with Outputs" button to generate the TDE file.

Analytics Canvas will generate the TDE file.
