# Analytics Canvas Tutorial:

## *How to use the Sort Block*

### **Overview**

Welcome to Analytics Canvas's Sort Block tutorial. This is one of a number of detailed tutorials in which we explain how each feature within Analytics Canvas works, with additional context to help you understand it better, and to use it to best suit your own needs.

### **How to use the Sort Block**

*Figure 1: Sort Block*

To sort data using the Sort Block:

Step 1. Drag and drop a Sort Block from the Block Library onto the Main Canvas.

Step 2. Connect input data.

Step 3. Select column(s) to sort.

Step 4. Specify the column order and the sort direction.

Step 5. Click on the output stub of the Sort Block and use Data Viewer to evaluate the results.

# Analytics Canvas Tutorial:

## How to use the Sort Block

The screenshot shows the Analytics Canvas interface. At the top, a workflow is visible with four blocks: 'www.datamartist.com Google Analytics', 'Calculation', 'Sort 1', and 'Excel Workbook export 1'. The 'Sort 1' block is highlighted with a blue border. Below the workflow is a 'Main Canvas' tab. The 'Sort 1' configuration panel is open, showing the following settings:

- Block Name:** Sort 1
- Sort By (In order):** [sessions] (Descending), [bounces] (Descending)
- Selected Column:** Field Order (Up, Down), Sort Direction (Ascending, Descending)
